

XM is suppling somthing that the public is demanding, that's the way the economy works. I don't listen to FREE radio because FREE radio plays the weather when FREE radio wants, not when I want. FREE radio plays the traffic report when they want to, not when I want. FREE radio plays the news when I want to listen to Michael Jackson.

I pay for XM because I can listen to what I want, exactly when I want.

IF the NAB doesn't like it, tell them to get their thumbs out of their butts and compete the way the rest of the world does instead of paying aff a bunch of politicians to make a stupid law. And I bet some of those politicians have XM radio and use the traffice reports.

The FCC should reject the NAB's petition 04-160.

I am paying for it and I'll get it my way, one way or another and it won't be from FREE radio!

In fact, Monday morning, I am pulling all my local radio ads in protest of this and I hope other people do the same!
